

AI that amplifies your **craft**. Owned by your team.

A world-class AI marketing journey, together.

The newest AI in your team's hands, built to improve how your agency works. Marketing systems your team runs and improves, not black boxes. Less manual work, sharper decisions, more output.

Built inside Picsart, a 150M-MAU creative company

Kick Off · Milestones · Retainer

You own everything we build

— TRACK RECORD

Already built. Already running.

Built and shipped inside Picsart, a 150M-MAU, billion-dollar creative company.

120+

AI agents &
automations

50+

videos & 100+
photos a week

20+

integrations &
tools

60+

marketers & PMs
trained

01 Leadership visibility. Weekly performance and competitor summaries for the CEO and marketing leads.

02 Lifecycle on autopilot. A multi-agent CRM system that ships push and email campaigns every week.

03 Creative at volume. Trend to finished short-form cut, on-brand, first pass without a designer.

04 Always-on trends. A radar that flags what's rising in a category before competitors react.

05 Instant knowledge. Grounded answers across a large internal library in seconds.

06 Taught, not just built. AI Product Management at the Armenian Code Academy, mentoring for PMs, and AI sessions for a bank.

The same playbook, now offered to MET as a hands-on partnership, not a black box.

— CREATIVE, AT VOLUME

On-brand assets in minutes. Your team directs the finish.

Seven social creatives generated for this proposal, across your verticals, minutes each. The same engines produce first drafts your art directors crop, retouch, and set type on.

The on-brand starting point, in minutes. Your team owns the finish: crop, retouch, type, taste. These are raw first drafts, not final client work.

REAL DATA · PUBLIC SCRAPE

Instagram Performance Report

Client: MET Agency
@met_agency_ - 4,541 followers
Apr 15 to Jul 01, 2026

Real public data for @met_agency_ scraped Jul 08, 2026. Likes, comments, cadence and formats are public. Reach, impressions, saves and profile visits are owner-only in Meta and are not shown here. With your Business Manager connected, this same report adds those, plus the paid and collaboration split.

ENGAGEMENT PER POST

Each bar is one post (likes + comments), oldest to newest. The spread shows how much a strong post outperforms a quiet one.

A real report, from your live data.

We pulled @met_agency_'s live Instagram data and generated this one-page report automatically. Public metrics today. Reach, saves and the paid split get added the moment you connect Meta.

— HOW WE WORK TOGETHER

A long-term journey, not a one-time training.

Structured learning, then hands-on implementation, then a consultant on call. In your words, and ours.

1

Kick Off

Structured learning, setup, and an audit.

2

Milestones

Hands-on implementation on your real work.

3

Ongoing

Guidance, new-AI updates, support whenever needed.

— PHASE 1 · KICK OFF

Set the team up. Find the highest-value work.

01

Workspace setup

Claude Code (1-2 builder seats to start), Visual Studio, and a MET GitHub. The environment your team builds in.

02

Hands-on training

The whole team, on your real work: agentic AI, AI for marketing reporting, AI for graphics and video, and building.

03

Audit

Your needs, brand resources, clients, workflows and toolstack, which locks the milestone roadmap and the first thing to ship.

You finish Kick Off with the team trained, your workspace live and in MET's name, a locked roadmap, and your first product, automatic client reporting, already shipping. A running start, not a report.

900,000 ₹ Kick Off

— PHASE 2 · MILESTONES

Systems your team owns and improves.

Built for exactly what you asked to cover: SMM (strategy, brand-voice copy, briefs to assets, scheduling, Meta reporting and ads, AI design, chatbots, lead flows) and marketing research. Priority set with you in the audit. No one needs to code.

First shippable product

Weekly client social-media reporting, automated.

One client to start: a one-page weekly report built automatically from live data, like the one above. Ships in about a week, running in parallel with Kick Off, so you see a real result before anything bigger.

~500,000 ₹
ships in ~1 week

01

**Copywriter, Briefer
& Brand agent**

Client input into structured briefs and on-tone copy, kept on-brand from your guidelines.

Faster briefs. On-brand copy. Automatic brand QA.

02

Trend agent

Detects and scores trends, then writes ready-to-shoot briefs.

Never miss a trend. React in hours, not days.

03

Photo, Video & Motion creator

On-brand stills, short-form video and motion, from trend to finished cut.

More creative per week. Faster launches. You keep control.

04

Knowledge base

Your principles, practices and client info, searchable by the whole team.

Instant answers. Faster onboarding. Nothing lost.

05

**Client proposal &
outreach builder**

AI-built client proposal pages like this one, plus outreach.

Win more pitches. Respond in a day. Send pages like this one.

06

**Marketing Intelligence
Dashboard**

The flagship, and a full internal product, not an agent or automation: all performance in one place, organic, paid and collaboration, per client and per channel, built into your own site with product-management rigor.

One source of truth. A product your team runs and sells.

Plus our recommendations beyond your list, the tools, automations and best practices we'd add: a Meta Ads copilot, Messenger and Instagram chatbots with lead qualification, scheduling and publishing, a competitor radar, and internal operations automations.

One milestone at a time, locked before the next.

You build the first version with me, then own it.

1

Scope

Define the outcome and deliverable.

2

Build

A working version in about a week.

3

Iterate

3 to 4 rounds of your feedback.

4

Lock

Runs autonomously, your team owns it.

5

Next

On to the next milestone.

Your fractional AI lead.

- ◆ **Guidance and updates on new AI developments**, a live session every Friday.
- ◆ **Support whenever you need it**, plus upkeep as the underlying tools change.
- ◆ **New milestones on request**, scoped and priced as they come.
- ◆ **Set with you by scope**, the monthly reflects what you take on.

400,000 ₪

per month · month-to-month

You own the tools. No lock-in.

- ◆ **Claude Code** (1-2 seats) + **Claude & Gemini APIs**
- ◆ **Meta** for client performance data
- ◆ **Picsart / Higsfield** for images and video
- ◆ **GitHub**, plus optional scraping and trend feeds
- ◆ Small monthly running cost, all in MET's name

Hybrid, with clear owners.

- ◆ **In-person kickoff** sessions for everyone
- ◆ **Async milestone building** with named owners on your side
- ◆ **Slack and Telegram** support, about 24h response

Your data. Your accounts. No lock-in.

Everything in MET's name

Your GitHub, your API keys, your Meta Business Manager.

Client data stays with you

It lives in your accounts. It never moves to mine.

NDA before the audit

Signed before we look at anything.

Yours on exit

Keep the source, the docs and the credentials. My access is removed.

— INVESTMENT

Start small. Scale with results.

Priced for the local market, in Armenian dram, and a starting point, not a fixed menu. Lighter milestones cost less, bigger builds cost more, and every scope and price is heavily scoped and finalized with you in the audit or a later phase.

Business results are what matter.

Kick Off

900,000 ₼

Workspace setup, whole-team training, and the audit.

First product: automatic reporting

~500,000 ₼

Your first shippable system, in parallel with Kick Off.

Further milestones

500K-1M ₼

Agents, automations, websites, dashboards. Each is different and heavily scoped with you, in the audit or a later phase.

Retainer

400,000 ₼/mo

Friday session, upkeep, new milestones on request. Set with you by scope.

Let's build it together.

A short call to green-light the Kick Off. This page, the on-brand creatives, and the live report above are all examples of what we build.
